LinkedIn: linkedin.com/in/udayramageri09 | **GitHub:** github.com/udayramageri09

Summary

Pre-final year **Information Science Engineering** student and **Full-Stack Developer** specialized in the **MERN stack** and **AI-driven applications**. Experienced in **SDLC**, **API Integration**, and **Leadership** through roles as **Placement Coordinator** and **IEEE Vice Chairperson**. Passionate about optimizing organizational workflows and building scalable, user-centric software solutions.

Skills

Programming & Querying: C, C++, JavaScript, SQL
Computer Science Fundamentals: DBMS, OOPS, Data Structures and Algorithms, Software Engineering, Service Oriented Architecture and Cloud Computing
Tools & Platforms: Git, GitHub, SQLite and VS Code.

Education

B.E (Information Science and Engineering) <i>BMS College of Engineering, Bangalore</i>	2023 – 2027 <i>CGPA: 8.45/10</i>
12th <i>Adarsh Pre-University Science College, Hubli</i>	2019 – 2021 <i>Percentage: 93.33%</i>
10th <i>Shri Parshwanath English Medium School, Gadag</i>	2018 – 2019 <i>Percentage: 90.24%</i>

Projects

FinSphere: AI-Driven Personal Financial Intelligence Platform Tech Stack: Next.js, Node.js, MongoDB, WebLLM (Llama-3/Phi-3), OneMoney API, Docker Key Features: Architected a MERN-based platform integrating the OneMoney Account Aggregator API to automate secure, consent-based financial data ingestion. - Developed a client-side AI layer using WebLLM and WebGPU to run local LLMs (Llama-3/Phi-3), achieving 100% data sovereignty via browser-based processing. - Engineered a proprietary Financial Health Index (FHI) algorithm and implemented zero-footprint security featuring local PII scrubbing and AES encryption.	Status: In Progress
BMSCE IEEE Website and Membership Portal Tech Stack: React.js, JavaScript, MongoDB Key Features: Developed a full-stack membership portal, automating the annual registration process for 700+ students and faculty members . Integrated a secure payment gateway and JWT-based authentication, reducing manual transaction verification time by approximately 40% . Designed a scalable database schema in MongoDB to manage real-time user profiles and transaction history, ensuring 99.9% data consistency.	Status: In Progress

Leadership

Placement Coordinator <i>Dept. of ISE, BMSCE</i>	July 2025 – Dec 2027
Vice Chairperson <i>BMSCE IEEE Student Branch</i>	Jan 2025 – Jan 2026
Bangalore Section Co-Lead <i>IEEEExtreme 19.0</i>	May 2025 – Dec 2025
Club Coordinator <i>Phase Shift 2025, BMSCE</i>	Aug 2025 – Oct 2025
