PROJECTS

College Academic ERP System

Developed a web-based Academic ERP system for managing students, faculty, departments, course registration, attendance, and internal marks. Implemented JWT-based authentication and role-based access control using Spring Security. Built the backend using a layered architecture (Controller-Service-Repository) with Spring Dependency Injection and MySQL.

Tech Stack:

- Backend: Spring Boot (Java), Spring Security, JWT, JPA/Hibernate
- Frontend: React.js
- Database: MySQL, NoSQL

MindfulBlocker – Android Digital Wellness App

MindfulBlocker is an Android digital wellness app that promotes mindful app usage by requiring users to enter a valid reason before opening blocked apps. Built with Kotlin, it uses Accessibility Services, the Datamuse API for validation, and Room Database for local data storage.

Tech Stack:

- Language: Kotlin · Platform: Android Studio
- Database: Room Database (SQLite)
- Architecture: Android Accessibility Service, Broadcast Receiver
- APIs: Datamuse REST API · Tools: Gradle, Android SDK
